By Appointment.

Warwick Castle is a magnificent edifice on the banks of the River Avon. The first fortress was built in 915 by Ethelfleda, the daughter of King Alfred. The Castle was strengthened and towers added at various periods, and in 1605 Sir Fulke Greville transformed it into the "most princely seat in the Midlands." It is famous as the home of Warwick, "the King-Maker," and contains many objects of great historical interest.
